Fabulous Filigree

By [Skirt.com](#), Friday, January, 22, 2010 1 comments

Worldly weaving.

"Mompox filigree" is characterized by the use of the filigree technique or work in miniature dimensions. The technique is the process of stretching, twisting and flattening a very high quality of strands of gold or silver in order to produce intricate, beautiful jewelry.

Kalen Trujillo Redmon discovered artisans that are masters in this form of jewelry making while traveling the globe. She created [Limón Verde](#) to bring their work to the world. Her pieces are hand chosen and often only available in very limited quantities. (But shhh! surprisingly affordable.) The detailed weaving and spinning of the metals to create these delicate patterns is a treasured, time-honored tradition.
